

# Series

Series is a sequential order of terms arranged in such a way that each term in the series is obtained using some specific rules. e.g. In the series, 2, 4, 6, 8, ... the consecutive even numbers are given.

Series may be broadly divided into the following types

1. Number series
2. Letter series

## 1. Number Series

In this type of questions, we are given a sequence of numbers including one or more missing numbers. This series follows a pattern. Keeping this pattern in mind, we have to find the missing terms.

The pattern can be based on addition/subtraction of numbers, multiplication/division of numbers, square/cube of numbers etc.

**Directions (Example 1-3)** Choose the correct alternative from the given ones that will complete the series.

**Example 1** 5, 6, 9, 14, 21, ?

- (a) 26      (b) 28      (c) 30      (d) 34

**Sol. (c)**  $5 \xrightarrow{+1} 6 \xrightarrow{+3} 9 \xrightarrow{+5} 14 \xrightarrow{+7} 21 \xrightarrow{+9} 30$

This sequence consists pattern of addition of consecutive odd numbers. To the previous one.

**Example 2** 1, 3, 9, 27, 81, ?

- (a) 216      (b) 220      (c) 243      (d) 250

**Sol. (c)**  $1 \xrightarrow{\times 3} 3 \xrightarrow{\times 3} 9 \xrightarrow{\times 3} 27 \xrightarrow{\times 3} 81 \xrightarrow{\times 3} 243$

Next number of this series is multiplication of 3 with previous one.

**Example 3** 71, 55, 46, 42, ?

- (a) 40      (b) 41      (c) 39      (d) 38

**Sol. (b)**  $71 \xrightarrow{-4^2} 55 \xrightarrow{-3^2} 46 \xrightarrow{-2^2} 42 \xrightarrow{-1^2} 41$

This sequence is based on subtraction of squares of natural numbers.

## 2. Letter Series

In this type, letters of English alphabet are arranged in a particular pattern like reverse order of letters, skipping of letters, position of letters in alphabetical order etc. The candidate has to find the missing term based on that pattern.

**Directions (Example 4-6)** Choose the correct alternative from the given ones that will complete the series.

**Example 4** J, O, S, ?, X

- (a) V      (b) Y      (c) M      (d) N

**Sol. (a)**  $J \xrightarrow{+5} O \xrightarrow{+4} S \xrightarrow{+3} V \xrightarrow{+2} X$

**Example 5** N, D, O, C, P, B, ?, ?

- (a) A, D      (b) B, E      (c) M, P      (d) Q, A

**Sol. (d)** This is an alternate series

$N \xrightarrow{+1} D \xrightarrow{-1} O \xrightarrow{+1} C \xrightarrow{-1} P \xrightarrow{+1} B \xrightarrow{-1} Q \xrightarrow{+1} A$

**Example 6** N2, P4, R8, T16, ?

- (a) T, 32      (b) M, 28      (c) V, 32      (d) L, 18

**Sol. (c)**  $N \xrightarrow{+2} P \xrightarrow{+2} R \xrightarrow{+2} T \xrightarrow{+2} V$   
 $2 \xrightarrow{\times 2} 4 \xrightarrow{\times 2} 8 \xrightarrow{\times 2} 16 \xrightarrow{\times 2} 32$
